APDC 75/10R | APDC 75/15R

Drain Cover Without Recess
900x400x100 | 900x400x150
APDC 90/10 | APDC 90/15

Drain Cover With Recess
900x400x100 | 900x400x150
APDC 90/10R | APDC 90/15R

DRAIN SLABS

These slabs can be used to close the range of manholes, drain gutter sections etc. The concrete lead is profiled to fit directly into the cover slab and be flush with the top.

Benefits:

- These are made from eco friendly materials
- High strength
- Good finishing to the landscape
- Aesthetically pleasing

Brick & Block

— all dimensions are in mm —

CONCRETE BLOCKS

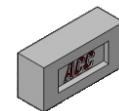

Excellent strength and finish for all types of walls and foundation.

Benefits:

- These are made from eco-friendly materials
- Saving of mortar and plaster
- Available in different sizes: 300mmx230mmx150mm

Brick & Block

— all dimensions are in mm —

Brick
230x110x75
APB 75

Solid Block
230x300x150
APB1 50

BRICKS

Superior finish and strength, produced using hi-tech machines.

Benefits:

- Made from green eco-friendly materials
- Uniform size and shape requiring less mortar and plaster
- Needs lesser number of green bricks compared to red bricks for every cubic meter
- Approved for use in various Government Departments
- Produced as per BIS (Bureau of Indian Standards)

COVER BLOCKS

These are essentially spacers used to lift the rebar matrix off the bottom of the slab or the ground so that the concrete may flow underneath the rebar. In order to prevent corrosion of the rebar it needs to be fully encased in concrete.

Benefits:

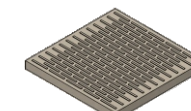

- These are made from eco-friendly materials
- Greater roof strength
- Prevents steel from rust and corrosion
- Concrete spreads evenly on the entire surface
- Provides fire protection to steel bars
- Enhances life of the structures
